

### What exactly is the Southbohemian airport, Inc.?

The joint-stock company of Jihočeské letiště České Budějovice a.s. (South-Bohemian Airport) has been established by the Region of South Bohemia and the Statutory Town of České Budějovice in an attempt at operating an open international airport at the south of Bohemia.

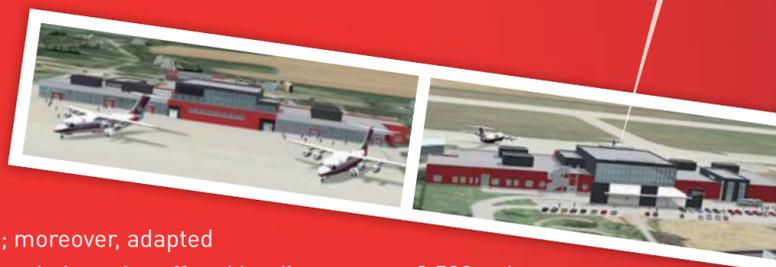

The airport is licensed to handle non-public international traffic and even now the license allows it to land and take off medium-sized aircraft. The current facilities and equipment are sufficient for only daytime flights in clear visibility.

### What are our plans?

The year of 2009 finds the České Budějovice Airport at the early phase of comprehensive modifications intended to open the region of South Bohemia to regular traffic by Boeings 737 or Airbuses A 320.

At present the Airport is ready to launch a sweeping reconstruction and upgrade effort aimed to build a new terminal and to install new radio-navigation devices and a lighting system; moreover, adapted to better suit the needs will be the existing take-off and landing runway, 2,500 m long.

### Reasons to fly in?

The airport is situated in the very center of the South Bohemia 10 minutes from the famous beer city of České Budějovice. The well known historical monuments UNESCO are only 20 minutes away: typical southbohemian village Holašovice and beautiful town Český Krumlov known as a second largest castle in the Czech republic. The Sumava mountains are only 50 km away from us.

### Do you wish to see Prague?

You can make it in one day. Our capital is only 135 km far.
